1. European Public Health Conference

EUROPEAN
PUBLIC
HEALTH
CONFERENCE

Health in Europe: are we there yet?
*Learning from the past,
building the future*

Brussels - 6th European Public Health Conference – 13-16 November 2013

The abstracts for the Brussels 2013 conference are being submitted. Please do not forget the **deadline for submission: 1 May 2013** (midnight CET).

The plenary programme has been updated and has a wide range of excellent speakers and panellists. Please check the website for the latest news: www.eupha.org/Brussels2013.

We are currently working on the pre conference programme with about 20 interesting sessions being planned at the moment.

If you are interested in organizing a workshop or participating in one, please feel free to contact office@eupha.org.

2. EUPHA update

Latest news - EUPHA

EUPHA joins the EHMA case for Health Services Research funding in Horizon2020. The European Commission set out its priorities for research programme Horizon 2020 which holds a budget of €80 billion for the period 2014 to 2020. On behalf of EHMA, chair of EHMA's Scientific Advisory Committee Kieran Walshe co-authored with Martin McKee, Mark McCarthy, Peter Groenewegen, Johan Hansen, Josep Figueras and Walter Ricciardi an op-ed for the Lancet commenting on the envisioned budget.

Both the opportunity and need for learning about systems and services through health services research, and its significant contribution to making health services as safe and efficient as possible are outlined. In the light of Horizon 2020 it is emphasised that the European Commission's view on health research priorities – and accordingly funding across the wider health sector – risks remaining too narrow and focused on biomedicine, pharmaceuticals and medical technologies. Consequently, a strong point is made for increasing funding for health services research for the benefit healthcare and the wider well-being of European citizens. The article is online available [on the website of the Lancet](#) (access required).

EUPHApedia – Building knowledge and capacity together

At the end of March 2013, we have 2895 documents included in EUPHApedia (increase of 35 from last month). This month, we have included the presentations from the Malta 2012 conference we received. All persons in our database have access to search EUPHApedia, all EUPHA members can upload information on to EUPHApedia.

3. Interesting News

Pioneers in Healthcare – Conference with a reduction for EUPHA members

Pioneers in Healthcare provides a unique opportunity for those facilitating and effecting change within their field to interact and collaborate on the critical issues facing healthcare research today. Bringing together researchers from across the world, this is more than just an event: it is the sharing of over 500 research stories and experiences, and will offer the opportunity to build partnerships, promote collaboration and drive innovation.

Have a look at the full speaker line up [here](#)

We have secured an exclusive discount for you, when booking a ticket, just enter EUPHA13 in the box for an extra £100 off the 2 day or 2 day+dinner ticket.

New office for the WHO Regional Office for Europe

As of 2 April, WHO's Regional office for Europe will be relocated to the new UN City in Copenhagen, Denmark. For more information:

<http://www.euro.who.int/en/home/sections/news/2013/03/whoeurope-in-copenhagen-moving-to-new-premises>

EUROSAFE

Brussels, 14 March 2013 – On the occasion of the 15th European Consumer Day, organised by the European Economic and Social Committee on 14 March in Brussels, a coalition of twenty-eight European umbrella organisations are issuing a [Joint Call](#) appealing to the European Institutions and the Member States to create an EU-funded accident & injury data system under the co-ordination of the European Commission.

Earlier this week EuroSafe reported that 41 million injuries per year are treated in Emergency Departments across the EU (see report '[Injuries in the European Union](#)'). This is not only an extraordinarily high number but these injuries also contribute to significant healthcare costs, a share that is estimated at €78 billion each year. Three-quarter of such accidents occur at home or while engaged in leisure, including sports.

Aiming to reduce the number of preventable injuries and also healthcare costs, a broad coalition of European business groups, consumer organisations, standardisation bodies and safety promoters urge the European Commission to found and fund an EU-wide accident and injury data system in a representative sample of emergency centres.

They are convinced that such a system would contribute to safer products for consumers, better standards and regulations, and fewer accidents and injuries. Moreover, the cost of creating such a system would be more than offset by reductions in health care costs.

HEAL publishes report: Coal's health bill reaches €43 billion a year

- Air pollution from burning fossil fuels blamed for premature deaths and illnesses, health groups urge major rethink of EU energy policy
- New study shows how moving away from fossil fuels would boost health by significantly reducing chronic lung disease and some heart conditions
- Recent upturn in the use of coal makes awareness of health costs more urgent and is at odds with events promoting the EU Year of Air 2013

EuroREACH – Health Data Navigator

EuroREACH, a coordinated action under the FP7-Health programme is providing the **Health Data Navigator** as a toolbox to researchers, policy makers and other stakeholders. This digitised compendium exhibits a conceptual framework and validated information about available data sources suitable for performance assessment.

The **Health Data Navigator** features EuroREACH results and is designed to be dynamic to encourage cross-country exchange of best practices without providing a comprehensive inventory of databases. The ultimate aim is to improve the quality of comparative health systems analysis and performance measurement.

On May 16 and 17 2013 we will present the findings of EuroREACH at the **final conference** in Vienna. For more information: www.euroreach.net/final-conference.

Europa Media – Proposal coordinator's actions (part 4)

In our last article, we arrived to the stage in proposal development when we have a sound partnership, a clear picture of all of the call requirements, and know what we need to compile in terms of technical, financial and administrative data. We are now ready to actually write the technical proposal, develop a budget and fill in the financial and administrative forms. Here comes the challenge: who will actually take on this responsibility and when and how everything will be prepared?

This is a team work to be led by a “proposal coordinator” (you!), who may be the owner of the project idea or assigned to this role by the institution coordinating the project. In this process, the proposal coordinator will need to act like a conductor of an orchestra. A sound plan also needs to be in place; this plan should indicate what needs to be compiled by when with a number of strict deadlines and milestones until the proposal submission deadline.

Clearly, you will need the input of your partners to various parts of the proposal. Some of this input will be generic, which need to be provided by all of the partners (e.g. administrative and financial data), while you will also need specific technical input for the technical parts of the proposal. The latter is usually more difficult to acquire from the partners. Here, if you know your partners’ expertise very well, you can request and obtain from them very relevant input for different parts of the proposal. The proposal coordinator’s goal here should be to get the most out of these partners.

In order to organise this process and receive consistent and complementary input (as opposed to receiving overlapping input and ending up having gaps), first make a good outline of the proposal with specific sections and sub-sections including the major project activities and their brief definitions (i.e. work packages). Provided that you have a good picture of your partners’ expertise and capabilities vis-à-vis the project concept, you may already assign roles to the key partners, such as “work package (WP) leadership” in the project. In that case, those partners should compile and develop the relevant sections of the proposal (e.g. WP descriptions, related background information, etc.). Similarly, for those specific technical chapters, you can turn to the most relevant partners and ask them to compile those chapters. In so doing, compile a first draft of the proposal with the main objectives and concepts as well as work plan laid out and ready to be further developed or adjusted, as needed.

In our next post, Part 6 of this series, we will discuss how to further develop and complete the proposal and bring it to finalisation.

4. EUPHA member updates

French Society of Public Health - www.sfsp.fr

La Société Française de Santé Publique a le plaisir d’annoncer son prochain congrès biennal, qu’elle organise cette année avec l’Association des Épidémiologistes de Langue Française, sur le thème de la prévention, du 17 au 19 octobre 2013 à Bordeaux.

Pour pouvoir bénéficier du tarif préférentiel d’inscription au congrès, veuillez vous inscrire avant le 30 juin 2013.

Pour plus d’informations, consulter le site internet <http://www.congres-adelf-sfsp-2013.fr>

Slovak Association of Public Health – www.savez.sk

Organises the 1st V4 Conference on Public Health combined with the 5th International SAVEZ conference. The main theme is “Adding years to life and life to years in V4 countries”. Organised from 9-10 May 2013 in Kosice, Slovakia.

5. Upcoming courses and conferences

Going International promotes training and further education for experts and newcomers in public health and humanitarian assistance around the globe. The flagship of Going International is the online education database »medicine & health«. It contains international courses, master programmes and conferences in the field of medicine and international health. Due to the large number and variety of training events the education database enables health professionals to find their educational event at their fingertips. For further information: www.goinginternational.eu/en/online-datenbank/ Going International is an official partner of EUPHA.

Title: Primary Health Care and NCDs in Eastern Europe and Central Asia:
Where do we stand and where to go?

Date: 10 April 2013

Place: Basel, Switzerland

Organiser: Swiss Tropical and Public Health Institute

7. European Commission news

Investment in Health set as a priority in the Social Investment Package published by DG Sanco.

The Social Investment Package (SIP), adopted by the European Commission today, aims to help Member States use their social and health budgets more efficiently and effectively.

The **investing in health component** asserts that health, as well as being a value in itself, is a precondition for economic prosperity. It makes the case for smart investments for sustainable health systems - spending smarter, but not necessarily more, investing in people's health -

particularly through health promotion programmes, and investing in reducing inequalities in health as a means of tackling social exclusion.

Building European reference networks in health care. Exploring concepts and national practices in the European Union

(Edited by Willy Palm, Irene A. Glinos, Bernd Rechel, Pascal Garel, Reinhard Busse, Josep Figueras)

Under the European Directive on the application of patients' rights in cross-border health care, the development of European reference networks was promoted as one of the prime areas for cross-border cooperation among Member States. These networks are meant to improve access to and provision of high-quality specialized health care to those patients who need it, and to act as focal points for medical training and research, information dissemination and evaluation, especially for rare diseases.

This book examines the ways in which reference networks have developed in European countries, for what kind of medical conditions or interventions, the motivations behind their establishment, the regulatory and administrative processes involved, and the financial arrangements needed. This study outlines the key policy implications and challenges of developing the concept of reference networks at national and European levels, and will assist policy-makers, health professionals, administrators and others involved in implementing the Directive.

For more information about the book, how to order and a link to the electronic version:

<http://www.euro.who.int/en/what-we-publish/abstracts/building-european-reference-networks-in-health-care.-exploring-concepts-and-national-practices-in-the-european-union>
